

ABOUT THE PROJECT

COMETS fills the knowledge and participatory gaps surrounding the low carbon energy transition to ensure citizens are at the center of the transformation and empower their creative potential.

RESULTS & BENEFICIARIES

COMETS will deliver the following publicly available results:

- Inventory, to be accompanied by a manual describing data sources, typologies, and validation procedures
- Supporting Web Platform for CAIs development
- Reports

COMETS will positively impact a variety of stakeholders: CAIs, Decision-makers, Citizens, SMEs, European Commission, and the Scientific Community. Stakeholders will be able to exploit the main outputs of COMETS.

The COMETS project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 837722

COMETS is advancing the scientific knowledge on the motives, potential, objectives and barriers of socially innovative Collective Action Initiatives (CAIs) and their historical and future role in the energy transition.

Collective action Models for
Energy Transition and Social Innovation

Collective action Models for
Energy Transition and Social Innovation

MAIN ACTIVITIES

Developing an enhanced, up-to-date definition of collective action in the energy sector;

Producing a Europe-wide inventory of CAIs;

Reporting on CAIs determinants, contributions and performance;

Surveying CAIs to provide more in-depth knowledge of characteristics and dynamics;

Designing manuals that provide a strategic roadmap for supporting social innovation in the energy sector;

Investigating case studies on existing CAIs that will be involved in co-producing knowledge and co-design scaling up strategies;

Supporting an open-sourced virtual platform for CAIs roadmaps, knowledge and development.

OBJECTIVES

COMETS investigates Collective Action Initiatives (CAIs) as the main driver of Social Innovation in the energy sector.

Two specific objectives derive from this goal:

- To build robust knowledge on social innovative processes in the energy transition as implemented by CAIs.
- To provide tools and recommendations for improving the start-up, steering, and up-scaling of CAI activities.

COMETS STRUCTURE
